

## Zagadka 1

<!-- Hey there! Remember when we said way back at the start that there were no hidden messages?-->

-->

<!-- Guess what? We lied. -->

<!-- After all, where would the fun be in that? -->

<!-- "Remember when computing was fun?" -->

<!-- We do hope you're all having as much fun with this as we are. -->

<!-- Isn't this a lot more fun than boring, dry press releases? -->

<!-- Anyway, back to the yellow and black... -->

<!-- To start, just look at the very first page, -->

<!-- To follow, begin where Nemo entered into a rage. -->

<!-- Then add to that what the Phoenicians used to see, -->

<!-- The end was found, fricatively wound, in the branches of the very first tree. -->

<!-- My whole was born in a place where a Celtic river was by Saxons, crossed, -->

<!-- A new incarnation of a parallel, once thought lost. -->

<!-- <bugs>Nyaaah. Ain't I a stinker?</bugs> -->

To start, just look at the very first page,

To follow, begin where Nemo entered into a rage.

Then add to that what the Phoenicians used to see,

The end was found, fricatively wound, in the branches of the very first tree.

My whole was born in a place where a Celtic river was by Saxons, crossed,

A new incarnation of a parallel, once thought lost.

## Zagadka 2

<!-- Alive without breath, -->

<!-- As cold as death. -->

<!-- Never thirsty, ever drinking, -->

<!-- All in mail, never clinking. -->

<!-- ... -->

<!-- What? Oh... well yeah. Ok, so I couldn't think of anything. -->

<!-- There was going to be a nice picture here called "hidden.png" but it got put up a day too soon and some clever clogs found it. -->

<!-- ... -->

<!-- Nope, that's it. You've had your lot. It's not my fault someone already found it. -->

<!-- ... -->

<!-- No, really. You can stop reading the source code now, we're done for today. -->

<!-- Don't you people have homes to go to? -->

<!-- ... -->

<!-- Seriously. We're done, see you tomorrow. Go out and have fun. Watch a movie! -->

<!-- Mmmm, popcorn. -->

<!-- ... -->

<!-- Hmm? Still here? -->

<!-- Oh well, as we're talking about movies, have you seen Avatar yet? I haven't. Been looking forward to it a while, but things keep getting in the way. -->

<!-- You know, things like this web site. It's not easy thinking up puzzles to keep you lot amused, you know! -->

<!-- I was going to go yesterday. Had it all planned, trip to the cinema with my girlfriend. Unfortunately she wasn't feeling too well, so we had to cancel. -->  
<!-- I should give her a call, see how she's doing. -->  
<!-- ... -->  
<!-- Ah, she's feeling much better. Looks like we're on for the cinema tomorrow. That's good. -->  
<!-- ... -->  
<!-- Woah! You're still here? I went and got lunch, I thought you'd be gone by the time I got back. -->  
<!-- I have to admit I admire your persistence, but we really are done. No more puzzles. Come back tomorrow, I'll have something really meaty for you then, I promise. -->  
<!-- ... -->  
<!-- Ooooooh Okay, you've twisted my arm. I'll think up something quick for you to puzzle over. -->  
<!-- ... -->  
<!-- Ok, here it comes. It's a good 'un... -->  
<!-- Psych! Ha ha! I was kidding. -->  
<!-- ... -->  
<!-- Actually I was kidding about kidding. Here it is. -->  
<!-- An age from the page of the Book of Law, -->  
<!-- Shall come to know an Olympian foe; -->  
<!-- Greek strife (formerly) once in, now outside, -->  
<!-- A Lazarus snatched, to join the ride. -->  
<!-- Too vague? Too cryptic? Well it was off the cuff, you know. I've got to be careful what I reveal. -->  
>  
<!-- ... -->  
<!-- Okay, okay. You want something more solid? Hrm. I can't really say much here. So let me just address a few rumours. No, you haven't seen this motherboard before. Yes, it's a desktop. No, the A-EON partners didn't design the Nemo board in their garages, and no it's not an evaluation board! Goodness. It was designed by a highly experienced design team to A-EON's specifications. Yes, it's high-end hardware. No, it doesn't have the number of cores you are thinking of. Whatever number you are thinking of. At least, not necessarily. No, we don't have a release date. Yes, it will be fairly soon. Yes, the software team does have functioning boards to work on already. Yes, it is the most powerful AmigaOS hardware ever. By a big margin. I did say high-end. Yes, it will come with a case. It's a computer we're making, not just a motherboard. Yes, Nemo IS just the start. -->  
<!-- ... -->  
<!-- What? What now? Not obscure enough? -->  
<!-- Sigh... -->  
<!-- Well people have been asking for some solid info. A joke can only go so far, and we will be revealing all we can currently reveal tomorrow. -->  
<!-- Anyway, what about that thing with the number of cores? Come on! That was pretty obscure. -->  
<!-- Look, just go back a page, look at the source there. Far more fun. Solve that charade riddle and you'll know a lot more about Xena. -->  
<!-- And with that, I am gone. Good luck, have fun! -->

An age from the page of the Book of Law,  
Shall come to know an Olympian foe;  
Greek strife (formerly) once in, now outside, A Lazarus snatched, to join the ride.  
Too vague? Too cryptic? Well it was off the cuff, you know.  
I've got to be careful what I reveal.
