

Product: Trevor's Amiga Blog

Author/Company: Trevor Dickinson

Version: Regular update

Product/Description & Overview:

Trevor's Amiga Blog represents the personal opinions and thoughts of Trevor Dickinson a long time Amiga enthusiast, collector and co-founder of A-EON Technology who, in his own small way, has helped to keep the Amiga dream alive. Although he has a particular fondness for the Classic AmigaOS and AmigaOS 4 he is also interested in all "Amiga-like" flavours including MorphOS, AROS & Icaros Desktop and Amiga emulation under WinUAE, AmigaForever, AmiKit & AmigaSys. In recent years he has even begun exploring the wonders of Linux, especially when installed on Next Generation PowerPC "Amigas".

Key Features:

Trevor has been posting his Amiga blog for almost two years and while it is clearly focused on the evolving Amiga scene there is also titbits of news and information from the wider computing world. Topics have included:-

- The evolution of Web browsers on the Amiga
- RadeonHD graphics cards and drivers for AmigaOS 4
- Visit reports and photos from various international Amiga shows
- Classic Amiga accelerators
- Linux distributions for the AmigaONE X1000
- PowerPC current development and future prospects
- Alternative low cost computing, games hardware and operating systems
- Internet snooping - Big Brother is watching us!
- And many other topics

Credits:

Trevor's Amiga blog is created on the AmigaONE X1000 using a combination of WordPress and Timberwolf or Odyssey browsers running under AmigaOS 4.1 Update 6.

System Requirements:

No special requirements. The blog is downloaded as a pdf file.
